

Welcome To Your Private Jacuzzi!

Good to Know!

- Before your arrival, we have **completely cleaned the jacuzzi**. The entire basin is drained, thoroughly cleaned, the filter is replaced, and the tub is refilled with **fresh, clean water**.
- Please note that a **swimming certificate is required** for using the jacuzzi. If someone does not have one, **supervision is mandatory** at all times.

Temperature & Heating

- The jacuzzi is **always set to 38°C (100°F)** – the perfect temperature for relaxation.
- The jacuzzi **refills itself automatically** when needed.
- Since we **fully clean the jacuzzi after every stay**, it's possible that the water is still **warming up upon your arrival**. Don't worry — it will reach the ideal temperature shortly!
- In special cases, we can **adjust the temperature** for you upon request.

Operation

On the edge of the jacuzzi, you'll find **two main buttons**:

1. **Light**: for creating a cozy, relaxing atmosphere.
2. **Jets**: to turn the massage bubbles on or off. *(They automatically shut off after about 10 minutes.)*
3. **Adjustable knobs**: You can control **the strength of the jets** using the dials on the rim or the buttons in the backrest.

Just one press is all it takes — the rest happens automatically!

Water Quality & Maintenance

- Our **technical team checks the water quality every 3 nights**.
- Would you like the water to be refreshed or checked sooner? No problem! Simply contact the **reception**, and we'll gladly assist you.
- Please **do not use shampoo or soap** in the jacuzzi.

Using the Cover

- Always **replace the cover** on the jacuzzi when not in use.
 - This helps keep the water warm, **saves energy**, and **maintains water cleanliness**.
 - Leaving the cover off allows dirt and debris to enter the water, which can quickly reduce its quality — and that would be a shame for your bubbling experience!
-

Safe & Responsible Enjoyment

- **The use of drugs is strictly prohibited.**
 - Please be **careful with alcohol consumption** in the jacuzzi — warm temperatures and alcohol can cause dizziness or nausea.
 - Be cautious when **entering or exiting** the jacuzzi: **the steps may be slippery** due to water or condensation.
 - **Never leave the jacuzzi unattended**, and always supervise **children or non-swimmers**.
-

Frequently Asked Questions

Why is the jacuzzi set to 38°C (100°F)?

The jacuzzi is set to around 38°C because it provides the **perfect balance of comfort, safety, and relaxation**. Being just above body temperature, the water feels pleasantly warm without being too hot or tiring. This temperature helps **relax muscles, ease joint pressure**, and **reduce stress** — making it ideal for ultimate relaxation!

Can the jacuzzi be made warmer?

Unfortunately, no. Temperatures above 38°C increase the risk of **overheating, dizziness, dehydration, and fainting**.

Can the jacuzzi be made cooler?

In special cases, yes — but for the best experience, we recommend keeping it at **38°C**.

How often is the water replaced?

After **every stay**, we **completely drain and refill** the jacuzzi with **fresh, clean water**.
